DEPOSIT
INSURANCE

Summary of Analysis
of Reform Proposals

036891

Summary

Our system of federal deposit insurance began operating in 1934. This system, which now protects about \$2.4 trillion in deposits, is a major factor promoting the stability of our financial system.

Changes in the financial environment have, however, led government officials and others to propose changes to the deposit insurance system because of concerns that existing arrangements

- create significant competitive inequities among financial market participants,
- probably result in a less than economically optimal allocation of the nation's financial resources, and
- create incentives on the part of insured institution managers to take inappropriate risks.

Prompted by these valid concerns and unprecedented losses in recent years, deposit insurance and executive branch officials have recommended higher insurance fund resources, risk-based deposit insurance premiums, and a number of other measures.

However, practical, comprehensive reform is difficult to design and implement for several reasons. The objectives of our deposit insurance system—protecting investors, promoting stability, and encouraging market efficiency—are not all easily satisfied at the same time. Also, the reactions of financial market participants to changes in deposit insurance are unpredictable, and how a reform proposal would be administered can be unclear. Changes implemented too rapidly or without due provision for long-run consequences could thus prove detrimental. The dilemma posed for those considering reform of the system is that in attempting to correct one perceived problem, we may exacerbate another or create the potential for a more unstable financial system.

This study emphasizes the interrelationship of financing, risk, and industry structure—characteristics of the deposit insurance system. Separate chapters discuss proposals related to the following six topics which a comprehensive strategy for deposit insurance reform must address:

- (1) How the largest commercial banks and savings institutions insured by the Federal Deposit Insurance Corporation (FDIC) and the Federal Savings and Loan Insurance Corporation (FSLIC) are treated.
- (2) Financing deposit insurance without relying on taxpayer subsidies.

(3) Varying insurance premiums according to the degree of risk posed by individual institutions.

(4) Protecting the deposit insurance system by increasing minimum capital requirements for some or all insured institutions.

(5) Achieving an appropriate degree of consistency between the FDIC and FSLIC insurance programs.

(6) Defining the roles of insured deposits and of insured institutions in the economy.

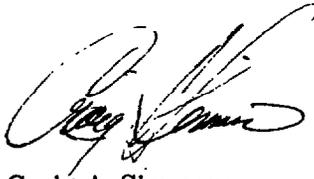

In this study, GAO does not endorse specific proposals for reform, nor does it conclude that comprehensive congressional action is urgently needed. We observe, however, that action to improve the financing of the deposit insurance fund, such as that proposed in the Federal Savings and Loan Insurance Corporation recapitalization plan, while desirable, will not resolve many important long run banking issues.

Much of the analysis in this study is based on GAO work at the federal bank regulatory agencies. It also draws heavily on governmental, academic, and other studies of the financial services industry and deposit insurance issues. The study was extensively reviewed by recognized experts on financial services industry matters and was forwarded to the five bank regulatory agencies and six trade associations for their review and comment. The comments of the regulators and trade associations along with our responses are contained in the study.

This study is published in two volumes. In the first volume, the major issues posed by deposit insurance reform are addressed. In the second volume supplementary information is provided for readers with specific interest in (1) how deposit insurance works; (2) interrelationships among bank risk, deposit insurance, and bank capital; (3) the history of deposit insurance; (4) changes in the financial services industry that bring into question the special nature of insured deposits and institutions; and (5) the operations of the individual insurance funds.

The tables of contents of both volumes follow this summary. Interested parties can obtain copies of these volumes by contacting Stephen C. Swaim on (202) 452-2409 or me on (202) 275-8678.

GAO wishes to acknowledge the cooperation of all parties involved in the preparation of this study.

Contents of Volume 1

Preface		1
<hr/>		
Chapter 1		8
Introduction	Goals and Success of Deposit Insurance	8
	Concerns About the Present System of Deposit Insurance	9
	Proposals for Change	11
	Objectives, Scope, and Methodology	12
	Assumptions	14
	Agency Comments	19
<hr/>		
Chapter 2		24
Large Institutions Pose Special Problems for the Deposit Insurance System	Nature of the "Big Bank" Problem	24
	Uninsured Depositors and General Creditors Have Been Protected in Big Bank Failures	28
	FDIC's Abandonment of Its Modified Payoff Procedure Indicates That a Credible Procedure Does Not Exist for Resolving Failures of the Largest Banks in Ways That Result in Losses for Uninsured Depositors and General Creditors	33
	Problems in the Relationship Between Banks and Their Parent Holding Companies Have Not Been Solved	42
	Agency Comments	44
	Conclusions	47
<hr/>		
Chapter 3		50
Deposit Insurance Financing	Concerns About Deposit Insurance Financing	50
	Summary of Insurance Fund Finances	51
	Financial Ratios Do Not Measure FDIC's and FSLIC's Risk Exposure	59
	Financing Powers of FDIC and FSLIC Could Limit Ability of Funds to Deal With Problem Situations	63
	Proposals to Change Insurance Fund Financing Powers or Reduce Insurance Losses	67
	Ability of FSLIC-Insured Institutions to Pay for Higher Deposit Insurance Cost	73
	Agency Comments	76
	Conclusions	79

<hr/>		
Chapter 4		80
Deposit Insurance Pricing	Risk-Based Premiums: Potential Benefits and Practical Problems	80
	FSLIC's Approach	83
	FDIC's Approach	86
	Information on How Market Participants Would React to Risk-Based Premiums Is Lacking	91
	Equity Considerations Remain	95
	Agency Comments	96
	Conclusion	97
<hr/>		
Chapter 5		100
Deposit Insurance and Capital Requirements	Nature of Our Concerns About Raising the Minimum Capital Standard for Commercial Banks	100
	Capital of Insured Banks and the Impact of a 9 Percent Minimum Standard	103
	Concerns About Adopting a Mandatory 9 Percent Capital Standard for All Insured Commercial Banks	114
	Concerns About Risk-Based Capital Requirements	118
	Agency Comments	120
	Conclusions	122
<hr/>		
Chapter 6		124
Deposit Insurance and Thrift Industry Changes	Thrift Industry Growth Has Not Been Accompanied by Comparable Growth in Net Worth	124
	The Existing Regulatory Structure Is Not Organized to Take Account of Interindustry Relationships That Affect Insurance Risks	127
	Insurance Fund Consolidation	132
	Agency Comments	135
	Conclusion	138

<hr/>		
Chapter 7		140
Deposit Insurance Reform Involves Choices About the Role of Insured Deposits in the Economy	Why Consider the Role of Deposit Insurance?	140
	Strategy 1: Cut Back Deposit Insurance	143
	Strategy 2: Extend Deposit Insurance, but Restrict the Use Made of Insured Funds	145
	Strategy 3: Allow Institutions to Diversify, but Price Risk	148
	Strategy 4: Allow Institutions to Diversify, but Close Institutions as Soon as Economic Net Worth Reaches Zero	152
	Agency Comments	154
	Conclusions	155
<hr/>		
Chapter 8		158
Conclusion	A Three-Part Agenda for Deposit Insurance Reform	160
<hr/>		
Appendixes	Appendix I: Comments From the Federal Deposit Insurance Corporation	164
	Appendix II: Comments From the Comptroller of the Currency	174
	Appendix III: Comments From the Federal Home Loan Bank Board	175
	Appendix IV: Comments From the National Credit Union Administration	180
	Appendix V: Comments From the American Bankers Association	181
	Appendix VI: Comments From the Independent Bankers Association of America	185
	Appendix VII: Comments From the Association of Reserve City Bankers	188
	Appendix VIII: Comments From the United States League of Savings Institutions	189
	Appendix IX: Comments From the National Council of Savings Institutions	198
	Appendix X: Comments From the Credit Union National Association	201

Contents of Volume 2

Preface		1
<hr/>		
Chapter 1		6
How Deposit Insurance Works	Deposit Insurance Covers About \$2 Trillion in Deposits	7
	Deposit Insurance Is Financed by Premiums and Special Assessments	8
	Agencies Can Choose Method of Liquidation	9
	Assistance Can Be Provided to Institutions That Otherwise Would Fail	12
<hr/>		
Chapter 2		14
Risk, Deposit Insurance, and Bank Capital	How Deposit Insurance Reduces the Chances of Bank Runs	14
	Deposit Insurance and Bank Capital	20
	Deposit Insurance and Commercial Bank Finances	22
	Who Benefits From the Effect of Deposit Insurance on Bank Finances?	24
<hr/>		
Chapter 3		26
The History of Deposit Insurance in the United States	Deposit Insurance Was Established in the 1930s After Many Banks and Associations Had Failed	26
	The Effect of Deposit Insurance on Reducing Bank Failures Cannot Be Determined	31
	The Changed Economic Environment of the 1970s and 1980s Resulted in More Failed Banks and Thrift Institutions	33
	Deposit Insurance Funds Experienced Record Losses	38
<hr/>		
Chapter 4		44
Changes in the Financial Services Industry Bring Into Question the Special Nature of Insured Institutions	Nature of the Deposit and the Services of Depository Institutions	44
	What Depository Institutions Do	46
	Competitive Factors Make It Harder to Distinguish Many of the Activities of Insured Institutions From Uninsured Ones	51
