James G．Bristol－
Claim for shipment of household goods
DIGEST：
Employee，who transported his household goods by rented truck，submits，as evidence of weight of goods，dimensions of truck and statement that 33 items weighed about 3,000 pounds．Evidence is not sufficient to establish constructive weight of goods for reimbursement on commit ed rate basis， nor does it substantiate that estimated weight approximates actual weight for reimbursement of actual expenses incurred．

This action is in response to the request for an advance decision by Mr．Kerman Morganstern，a disbursing officer at the Corps of Lifineers，Los Anecies District，Department of the Army，regarding the claim of li．James G．Bristol，a civilian employee of the Department of the Army，for rem－ burbenent of the expenses incurred in the shipment of his household goods．The request for an advance decision was forwarded to this Office by the Fer Diem，Travel and Trans－ potation Allowance Committee，PDIATAC Control No．75－40．

The record indicates that by a travel authorization dated August 21，1970，Mr．Bristol was authorized shipment of his household goods，not in excess of 11,000 pounds，pursuant to a charge of officisi duty station from Sacramento，California， to Phoenix，Arizona．The aumiristrative report states that Mr．Bristol was reimbursed for the shipment of 1,587 pounds of iouseinold foods by commercial carrier on September 24， 1970. Mr．Lriscol has filed a supplemental travel voucher for $\$ 310.54$ for the experises incurred in a second shipment of household goo is by rented truck frow his old duty station to his new duty station on April 13，1971．The disbursing officer ques－ trons whether the voucher may be paid on either a commuted rate or actual expensestasis．

The regulations governing the shipment of household goods at the time of Mr．Bristol＇s transfer were contained

In Office of Management and Budget Circular No. A-56, revised October 12, 1959 , an provides in section $6.4 d$ jin pertinent part as follors:
"(3) Foctrantatio: requited. Clairs for reimbursement weich the comuted rate system shall be supportci by (a) the oxdinal or a certilled copy of the receljoded warenowe bill for terporasy stcrege ant (b) in support of transportation, the orisinal bilis of ladine or certified coples, or, if billis of lading are not avallahie, other evidence shoring point of origin, destination and veigit. If no adequate scale is available at nolat of orfedn, at say and ea ronte, or at destination, a constructive weipht, basel on 7 pounda per culbic foct of properiy loaded vari space, tay be used. sucin constructive wefelt also ryy de used for a part load shen 1ts weflit could not so ctusine at ouiein, en wonte, or at destination, Fitout Eirst unleasing it or other part loaus betas arried in the saine vebicle."

Mr. Eristol lias not proviced an cficiul weight cericiacate, end the ajnimistrative report states thet it is reasonable to belisve thet ainauate scales were availabie at or near the ofis futy station. Eowever, assumge that arequate scales were wavotiable, oux offiee has hele in 40 Comp. Gen, 115 (1968) that refmbursmet on a comutej rete basis coulla be rade mener certain circutiotences, as follons:
'Taser that raguation the weiznt of nouschold gouds tusnsported for the purpose of comoting the comutes rete of parint allowable ruat be dotermione cttrer $3 y$ oive actuai scale weight of the goods or by tioe construcetve weinht of suck goods determiners on the basis of the space occupled when properly loaded for shipuent in a van.
"Since the employee falled to obtain the actual weight of his houschold goods at the time
of transportation, he may be paid at the comuted rate only if he is able to show the amount of space occupied by his goods and that the goods were properly loaded in the space available. In establishing the amount of space which would have been occupied by his effects if properly loaded, the employee nay subuit a list of items transported together with the volume occupied by each based on actual measurement or a uniform table, preferably prepared by a comercial carrier."

The employee has supplied the dimensions of the rented truck which, if properly loaded, would have provided 220 cubic feet of space and have carried a constructive weight of 1,540 pounds. Mr. Bristol has also submitted an affidavit that he moved 38 itens of furniture veighing an estinated 3,000 pounds. The employee, however, has not alleged that the truck was properly loaded and has not subiaitted a list of the items transported with either the estimated weight of each item or the volume occupied by each item based upon actual measurement. B-183557, November 18, 1975; and b-174093, December 8, 1971. Since reimbursement on a confuted rate basis may not be alloved absent proper evidence of the veight or volume of the goods transported such as will satisfy the law and regulations, the voucher may not be paid on a commuted rate basis. B-170353, September 3, 1970; and B-159839, September 7, 1966.

While an estimated weight may not be sufficfent for payment on a conruted rate basis, it mey, under ceriain conditions, furnish a basis for refobursenenc of antual expenses to the extent that those expenses do not exceed the commuted rate applicable to the estinated wetht. 33 com . Gen. 554 (1959); and E-181334, March 28, 1975. The evidcroe available must afford a basis for concluding that the actual weight of the goods shipped reasonably approutuates the estmated weight. See B-181334, Supra, and cases citch thercin. The evidence Mr. Bristol has presented does not swhstantiate the accuracy of the estimated weight, and therefore, the voucher may not be paid on an actual expense basis.

Accordingly, the voucher may not be paid.
