NATIONAL AIRSPACE SYSTEM

FAA Reauthorization Issues Are Critical to System Transformation and Operations

What GAO Found

This statement discusses six issues that are important in reauthorizing FAA programs. Many of these issues are deeply intertwined, and addressing one can affect the others. Balancing all of these issues will be a challenge, but is essential to FAA's ability to transform and operate the national airspace system safely and efficiently.

Ensuring the safe and efficient transformation to the Next Generation Air Transportation System (NextGen). FAA will need to accelerate the implementation of new and existing technologies, consider incentives for airlines to acquire those technologies, reconfigure facilities and enhance runways to take full advantage of NextGen's benefits, and sustain the current system while transitioning to the new one.

Strengthening oversight of aviation safety. Incomplete and inaccurate safety data jeopardize FAA's implementation of a new safety management approach. In addition, improvement of runway and ramp safety oversight is a key issue. For example, last year there were 25 incidents when collisions between aircraft on runways were narrowly avoided.

Reducing congestion and providing access to the national airspace system. FAA has taken steps to enhance capacity and reduce delays, such as redesigning airspace and placing caps on operations, but progress and improvements have been limited. Even as some areas experience more congestion, however, other areas of the country have seen service decline. This may increase demand for the Department of Transportation's subsidy program to provide a minimal level of scheduled air service for certain small communities.

Addressing aviation's impact on the environment. FAA, airports, and other stakeholders have worked to reduce noise, emissions, and other pollutants. Further efforts will be needed, particularly when trying to expand airport capacity.

Ensuring a sufficient, trained workforce. FAA faces a retiring air traffic controller workforce, the need for additional technical expertise to implement NextGen, and the need to improve relations with its labor unions.

Ensuring timely reauthorization of FAA programs. Short-term funding extensions and continuing resolutions could delay key capital projects. Timely reauthorization is critical to sustaining FAA's current programs and advancing NextGen.

What GAO Recommends

GAO has made prior recommendations to address some of these issues. FAA has begun to address GAO's recommendations, although some have not yet been fully implemented.
