General Government Division B-221097

February 14, 1986

The Honorable William Proxmire United States Senate

Dear Senator Proxmire:

Your letter of February 6, 1984, requested that we determine how much federal executive agencies spend on public relations. You stated that efforts were being made to eliminate unnecessary spending on developing, printing, and distributing periodicals and recurring pamphlets, but little was being done to reduce spending on public media relations.

Specifically, you asked that we determine

- agencies' public relations budgets and the number of employees involved in these activities for fiscal years 1981, 1983, and 1985, and
- the extent to which key agency public relations officials meet with each other or with White House staff and staff of other components of the Executive Office of the President to coordinate public information efforts.

As agreed with your office, agency "public relations," as used in your letter, encompasses both agency public affairs and congressional affairs activities. Consequently, these two activities were the focus of our review. We also obtained information on certain activities which are public affairs related but not classified as public affairs. Also, as agreed, budget data were reported based on obligations incurred or planned.

In defining public affairs and congressional affairs, we considered the definitions in our prior reports (see app. III for a listing of these reports) and the definitions used by the Bureau of the Budget (the Office of Management and Budget's predecessor) in its 1970 survey of executive agencies' public relations activities (see app. IV). As used in this report, public affairs involves efforts to develop and disseminate information to the public to explain the activities of and the issues facing an organization. Congressional affairs involves efforts to manage day-to-day contact with the Congress. Public affairs related activities cited in this report, such as recruitment and special military aerial teams, are examples of activities that are partly promotional but are not classified as public affairs. Our definitions of public affairs and congressional affairs appear in appendix I.

GAO/GGD-86-24 Public Affairs

We sent questionnaires to the 13 cabinet departments and 18 independent agencies to obtain the requested information and received responses from all of them. The information in the tables of this report was provided by the respondents and was not independently verified by us. The data supplied for fiscal years 1981 and 1983 were compiled from a mix of actual data and estimates. The data for fiscal year 1985 were prepared during the early part of that fiscal year and therefore are based on the agencies' projections of anticipated obligations and staffing. Caution should be used in drawing conclusions from the information provided because much of the data supplied involved "best estimates" and were not consistently prepared by the respondents. The information we obtained is summarized in the following pages. More detailed information is presented in appendixes I and II.

In summary, the responding agencies expected to obligate about \$337 million for public affairs activities during fiscal year 1985 with almost 5,600 full-time equivalent employees assigned to public affairs duties. In addition, about \$100 million was expected to be obligated in fiscal year 1985 for congressional affairs activities with almost 2,000 full-time equivalent employees assigned. These figures reflect an increase in obligations for public affairs and congressional affairs activities over fiscal years 1981 and 1983 but a decrease in personnel assigned to such duties in these same fiscal years. (See tables 1 and 2.)

### Table 1: Public Affairs Obligations and Staffing

 Table 2: Congressional Affairs

 Obligations and Staffing

Fiscal year	Obligations (000 omitted)	Personnel assigned <sup>a</sup>
1981	\$303,601	6,175
1983	\$290,574	5,705
1985	\$336,756	5,599

<sup>a</sup>Personnel data have been translated to full-time equivalents to reflect the applicable portion of the efforts and cost of personnel who do not devote their full time to such duties.

### Obligations (000 Personnel assigned\* 1981 \$79,702 2,089 1983 \$85,569 2,016 1985 \$99,861 1,982

<sup>a</sup>Personnel data have been translated to full-time equivalents to reflect the applicable portion of the efforts and cost of personnel who do not devote their full time to such duties.

#### Page 2

#### GAO/GGD-86-24 Public Affairs

Also, about \$1.9 billion was expected to be obligated in fiscal year 1985, primarily in the Department of Defense, for certain public affairs related activities not classified as public affairs. This figure reflects an increase in obligations for these activities over fiscal years 1981 and 1983, as shown in table 3. All of the amounts shown in the table represent obligations for Department of Defense activities except for recruitment by civil agencies (\$5,754,000 in fiscal year 1981; \$5,115,000 in fiscal year 1983; and \$5,793,000 in fiscal year 1985).

#### Table 3: Public Affairs Related Obligations

Obligations (000 omitted)
\$1,156,071
\$1,393,231
\$1,914,272

For fiscal year 1985, the Department of Defense for the first time included in reported obligations for the above mentioned activities the accrued cost of military retirement and survivor benefits associated with military personnel assigned to public affairs, congressional affairs, and public affairs related duties. The accrued cost was included pursuant to the military retirement pay accrual provisions of the fiscal year 1984 Department of Defense Authorization Act. This Act requires the Department of Defense to include in its budget, beginning with the fiscal year 1985 budget, the accrued cost of funding the Department's liability under military retirement and survivor benefit programs.

Agency questionnaire responses and follow-up discussions with agency officials disclosed that while some meetings between agencies and with White House staff and staff of other components of the Executive Office of the President do occur, regularly scheduled meetings to coordinate public information efforts do not take place.

Since the information in this report was obtained from the agencies primarily through the use of a questionnaire, we did not obtain the agencies' comments on this report. As arranged with your office, unless you publicly announce its contents earlier, we plan no further distribution of this report until 30 days from the date of the report. At that time we will send copies to the Senate Committee on Appropriations; Senate Committee on Governmental Affairs; House Committee on Appropriations; House Committee on Government Operations; and Director, Office of Management and Budget. Copies will also be made available to others who request them.

We trust that the information in this report is responsive to your needs. If we can be of further assistance, please let us know.

Sincerely yours,

22,9. anderso

William J. Anderson Director

	Table II.1: Obligations for Public Affairs Related Activities (000 Omitted)	19

Objective, Scope, and Methodology	The objective of this review was to obtain the following information requested by Senator William Proxmire in his letter of February 6, 1984, and as subsequently defined by his office:
	<ul> <li>the amounts obligated by executive agencies for public affairs and congressional affairs activities in fiscal years 1981, 1983, and 1985;</li> <li>the number of full-time equivalent personnel involved in these activities during those fiscal years; and</li> <li>the extent to which key public affairs officials of agencies regularly meet with each other or with White House staff and staff of other components of the Executive Office of the President to coordinate public information efforts.</li> </ul>
	To obtain this information, we developed a questionnaire and sent it to the 13 cabinet departments and 18 independent agencies. We also inter- viewed cognizant officials of various agencies as needed to clarify ques- tionnaire responses. The information in the tables of this report is based on information provided by the respondents. We did not independently verify the information. The data supplied for fiscal years 1981 and 1983 were compiled from a mix of actual data and estimates. The data for fiscal year 1985 were prepared during the early part of that fiscal year and therefore are based on the agencies' projections of anticipated obli- gations and staffing. Since the information was obtained from the agen- cies primarily through the use of a questionnaire, we did not obtain the agencies' comments on the report.
	Caution should be used in drawing conclusions from the information provided because much of the data supplied involved "best estimates" and were not consistently prepared by the respondents. The agencies had to use estimates to develop much of the data because the agencies' accounting systems were not equipped to provide the required informa- tion. According to agency officials, the inconsistency in the preparation of data was caused by differences in data maintenance, development, estimations, reporting techniques, and functional classifications. Addi- tional factors to consider in drawing conclusions from comparisons of the data are functional attributes of the agencies, such as the agency's mission, the extent of contact with the public, or the volume and nature of the congressional work handled.

#### Definitions

Federal agencies do not uniformly define "public affairs." During the 1970s, we issued a number of reports concerning public affairs activities. A central theme of several of these reports was the inconsistencies among agencies on what they consider as public affairs.

In defining public affairs and congressional affairs for the questionnaire, we considered the definitions used by the Bureau of the Budget (the Office of Management and Budget's predecessor) in its 1970 survey of executive agencies' public relations activities. We also considered definitions in prior GAO reports and the comments of cognizant agency officials during the pretest of our questionnaire. We defined public affairs and congressional affairs as follows.

<u>Public affairs</u> involves efforts to develop and disseminate information to the public to explain the activities of and the issues facing an organization. Following are some of the activities that we consider public affairs:

- issuing press releases on activities;
- responding to press inquiries;
- conducting press conferences and briefings;
- producing leaflets, fact sheets, articles, and periodicals for the general public;
- producing photographic and graphic materials for publications;
- producing material for radio and television broadcasts;
- organizing exhibits and offering speakers to schools and groups to explain the organization;
- conducting visitor activities, goodwill tours, orientation conferences, seminars, and other activities involving the public;
- developing advertising programs to provide information about the organization's programs and services;
- developing information provided in response to specific requests from the public (e.g., Freedom of Information requests);
- providing information that is intended to be useful to the public, such as information on improving health, promoting safety, or on the requirements of regulations; and
- preparing and distributing information that is technical or of interest to specific non-governmental user groups.

<u>Congressional affairs</u> involves efforts to manage day-to-day contact with the Congress. Following are some of the activities that we consider congressional affairs:

i

<sup>a</sup>According to Department of Energy officials, most of the increase for fiscal year 1985 was due to the expanded public information program of the Department's Bonneville Power Administration involving energy conservation and technology issues.

<sup>b</sup>According to Postal Service officials, the increase for fiscal year 1985 was primarily due to increased use of the media to publicize the various services offered by the Postal Service and to promote new stamp products.

Table I.3 shows public affairs obligations for the purchase of commercial and professional services and materials for media production included in table I.1. These obligations are for external costs for services rendered and materials provided in the research, development, planning, management, recording, filming, printing, production, preparation, and distribution of media material. The categories of media for which such obligations were reported include

- television, radio, and films;
- newspapers, magazines, and newsletters;
- displays, exhibits, posters, and billboards;
- demonstrations;
- speeches;
- brochures, circulars, handbills, envelope stuffers, pamphlets, and broadsides;
- books and catalogues; and
- graphics, photography, and slide shows.

### bligations for Public Affairs Related Activities

We obtained obligation data on selected activities that are public affairs related but are not classified as public affairs activities (see table II.1). The activities are partly promotional since they enhance the image of an agency. These activities are recruitment in the Department of Defense and other agencies, special military aerial teams, military bands, and military museums.

#### **Table II.1: Obligations for Public Affairs** Related Activities (000 Omitted) FY 1981 FY 1983 Activity FY 1985 **Department of Defense** Recruitment Active forces \$856.443ª \$1,001,130<sup>b</sup> \$1,297,519<sup>c,d</sup> 438.328<sup>c.g</sup> Reserve forces 188.616<sup>e</sup> 264,1881 Special aerial teams 12,813 11,195 15,372° Washington-based ceremonial bands 16.202 19.800 26.920° Base-level and academy bands 65,529 80.867 116,489<sup>c</sup> Military museums 10,714 10,936 13,851° **Other Agencies** 5.754 5.793 Recruitment 5,115 Total \$1,156,071 \$1,393,231 \$1,914,272 <sup>a</sup>Includes \$118,173,000 for recruitment advertising and printing. <sup>b</sup>Includes \$132,555,000 for recruitment advertising and printing. <sup>c</sup>Military retirement pay accrual included for first time. <sup>d</sup>Includes \$150,224,000 for recruitment advertising and printing eIncludes \$27,594,000 for recruitment advertising and printing. <sup>1</sup>Includes \$32,793,000 for recruitment advertising and printing. <sup>g</sup>Includes \$41,311,000 for recruitment advertising and printing. Military recruitment involves sizable obligations for advertising and printing. The special military aerial teams exhibit precision aerial maneuvers and perform at such events as airport dedications, aviation shows, expositions, fairs, and other civic events which contribute to the public's knowledge of the U.S. Armed Forces' equipment and capabilities. The five Washington-based military ceremonial bands are heavily committed to official functions within the Washington area. Occasionally, these bands perform national and international concert tours and are available for certain major events of public interest. Base-level and academy bands, in addition to their military functions, also perform at

community events. The military museums attract many visitors each

year.

1

	3
Columns	
(A)	Internal agency management. Include work done within the reporting agency to prepare materials for use in employee recruitment, orientation, and training. Exclude personnel interviewing, help- wanted advertising for specific job vacancies, and similar direct personnel office operations.
(B)	Congressional relations. Include staff time spent in maintaining liaison with members of Congress and their staffs, and preparing materials that are not specifically requested. Exclude resources applied to preparation of materials for and appearances at congressional hearings, and responses to specific congressional inquiries.
(C)	Agency activities. Include work involved in the development and presentation of information relat- ing to the activities of the agency or any of its bureaus or other organizational elements. Report information on agency programs and their objectives, and on agency operations and facilities (both old and new projects). This includes, for example, publicizing the effects of recent congressional action (for pending congressional action, use columns (B) or (E) as appropriate) concerning the agency, and other information of interest to local- ities, clientele groups, etc.
(D)	Benefits and regulations. Cover activities involving publicized information on specific benefits available under agency programs, such as time limits, eligi- bility, and procedures for filing claims. Also cover activities involved in providing information to the public on agency regulations and their interpretation, implementation, or rescission.
(E)	Issues and problems. Cover information prepared and disseminated on the agency position, or proposed action, on specific issues or problems such as natural disasters, installation closings, proposed legislation, and response to public criticism.
(F)	Other. Include information on activities directed toward purposes other than those included in columns $(A)-(E)$ . Each of these will be identified in a brief footnote.
(G)	<u>1969 totals.</u> Show the total of the entries in columns (A) through (F) for each type of output listed in the stub column.
