Retirement Security: Most Households Approaching Retirement Have Low Savings, an Update

Dear Mr. Sanders:

Our 2015 report, Retirement Security: Most Households Approaching Retirement Have Low Savings,\(^1\) included estimates on the percentage of households aged 55 and over with selected financial resources. To produce these estimates, we analyzed retirement savings data from the 2013 Survey of Consumer Finances, the latest available data at that time.\(^2\) You asked us to update these estimates using 2016 Survey of Consumer Finances data, which were released in September 2017. The table below provides the updated estimates, as well as those from the 2013 survey. For details on how we produced these estimates, please refer to our 2015 report.

We conducted our work from February 2019 to March 2019 in accordance with all sections of GAO’s Quality Assurance Framework that are relevant to our objectives. The framework requires that we plan and perform the engagement to obtain sufficient and appropriate evidence to meet our stated objectives and to discuss any limitations in our work. We believe that the information and data obtained, and the analysis conducted, provide a reasonable basis for any findings and conclusions in this product.
