## Information on Set-Aside Funding for Assistance to Older Workers

January 22, 1990

The Honorable David Pryor  
Chairman, Special Committee on Aging  
United States Senate

Dear Mr. Chairman:

This fact sheet responds to your August 16, 1989, request for information on the Job Training Partnership Act (JTPA) funding set-aside for assistance to economically disadvantaged older workers.

JTPA funding for employment and training services to older workers (55 years old and older) is provided primarily under title IIA of the act. Seventy-eight percent of annual funding to states under this title is provided to local service delivery areas for job training services to eligible individuals, including older workers. In addition, 3 percent of the state title IIA allocation is set aside specifically for services to economically disadvantaged older workers. Older workers are also served to a lesser extent under JTPA by the title III dislocated worker program.

As agreed with your office, we are providing information on the extent to which the states have been able to spend their 3-percent set-aside funds. We are also providing information on the expenditure rate of other JTPA programs, for comparison, and the extent to which older workers are being served by JTPA.

In developing this information, we obtained data from the Department of Labor; the National Association of State Units on Aging; the National Council on the Aging, Inc.; the National Governors' Association; and the Congressional Research Service. We did not verify the accuracy of the reported data, but we did compare data from multiple sources, where available, to determine whether it was consistently reported. We also relied on information obtained during our study of JTPA participants, services, and employment outcomes.<sup>1</sup>

## Expenditure Rates

The states have not fully expended the 3-percent set-aside funds available each year for older workers, but the expenditure rates have increased from an initial 28 percent to 70 percent in program year 1988. (See apps. I and II.) The average expenditure rate for the 3-percent

funds has been similar to the 51-percent rate for the title III program but substantially lower than the 73-percent rate for all title IIA funds.

The initial underexpenditure of 3-percent set-aside funds has been attributed to a slow start in developing services for older workers. This resulted in large carryover balances, which, in turn, contributed to the underspending problem in later years. However, expenditures have increased since the start of the program. For example, during transition year (TY) 1984,<sup>2</sup> about 28 percent of the older worker set-aside funds were spent. In program year (PY) 1988,<sup>3</sup> the expenditure rate increased to about 70 percent of the total funds available (annual allocation plus carryover funds from previous years). (See fig. 1.) When one excludes the carryover funds from the amount available and looks only at the annual allocation of 3-percent funds provided to the states, recent expenditure rates are higher. For example, during program years 1986-88, the states expended 100 percent of the annual allocation of 3-percent funds, as well as a portion of funds carried over from prior years.

**Figure 1: Three-Percent Set-Aside Fund Expenditure Rates**

<sup>2</sup>The transition year refers to the initial 9-month period of JTPA (Oct. 1, 1983, to June 30, 1984), which is designated TY 1984.

<sup>3</sup>A program year begins on July 1 and ends on June 30 of the following year. Thus, PY 1988 began on July 1, 1988, and ended on June 30, 1989.

The expenditure rate for 3-percent set-aside funds (as a percentage of total funds available) has been similar to the expenditure rate for the title III dislocated worker program.<sup>4</sup> Expenditure rates have averaged 51 percent for these two programs from TY 1984 through PY 1987. This is substantially lower than the title IIA program and the title IIB summer youth program, which had average expenditure rates of approximately 73 and 88 percent, respectively, during the same period. (See app. III.)

## Percentage of Older Workers Served

Overall, about 11 percent of all adults terminating from JTPA in PY 1987 were older workers. Most of these older worker terminées (62 percent) were served with 3-percent set-aside funds. The remainder were served with the regular title IIA funds<sup>5</sup> (24 percent) and title III dislocated worker program funds (14 percent). (See app. IV.)

Looking only at the title IIA program, about 12 percent of the adult terminées were older workers. This included about 9 percent served with 3-percent set-aside funds and about 3 percent served with the regular title IIA funds. (See app. V.)

Copies of this fact sheet are being sent to the Secretary of Labor and will be made available to other interested parties on request. Please call me on (202) 275-1793 if you or your staff have any questions about this fact sheet. Other major contributors are listed in appendix VII.

Sincerely yours,

Franklin Frazier  
Director, Education  
and Employment Issues

<sup>4</sup>Our report, *Dislocated Workers: Local Programs and Outcomes Under the Job Training Partnership Act* (GAO/HRD-87-41, Mar. 5, 1987), pointed out that the expenditure rate of title III funds was slow among many of the states (pp. 21-23 and app. II).

<sup>5</sup>The 78 percent annually allocated to the service delivery areas.

Title III	39	48	48	64	58	51
3-percent set-aside funds <sup>c</sup>	28	47	54	59	69	51

<sup>a</sup>Represents the expenditure rate for all title IIA funds, including 3-percent set-aside funds.

<sup>b</sup>Title IIB funds are accounted for on a fiscal year rather than program year basis.

<sup>c</sup>Based on total funds available—annual 3-percent allocation plus any carryover funds from prior years.

Notes: Terminees represent individuals whose participation ended during the program year

Data on the number of older workers served with 8-percent set-aside funds are not available.

<sup>a</sup>Seventy-eight percent of these funds are for job training services to eligible individuals, including older workers, whereas 3 percent are specifically set aside for older workers.

<sup>b</sup>All terminees served with 3-percent funds are assumed to be older workers.

<sup>c</sup>Represents 11 percent of total adult terminees.

<sup>d</sup>Represents 89 percent of total adult terminees.

<sup>a</sup>Data on participation in the 3-percent set-aside program for older individuals are not available for periods before PY 1986.

<sup>b</sup>Participants represent the number of individuals receiving services during a given program year. This number is higher than the number of terminees due to the overlap of individual enrollments from one program year to another.
