The Honorable Richard G. Lugar
Chairman, Committee on Agriculture,
Nutrition, and Forestry
United States Senate

Subject: Food Stamp Program: Implementation of the Employment and
Training Program for Able-Bodied Adults Without Dependents

Dear Mr. Chairman:

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (P.L. 104-193) amended the Food Stamp Act of 1977 by, among other things, tightening work requirements for food stamp participants who are between the ages of 18 and 50, able-bodied, and do not have dependents. (These participants are referred to as able-bodied adults without dependents, or ABAWDs). Specifically, the act prohibits ABAWDs from receiving food stamp benefits if they had received food stamp benefits for at least 3 months during the preceding 36-month period, unless they either meet the work requirement or live in an area that has been waived from the requirement because of high unemployment or an insufficient number of available jobs.¹ ABAWDs can meet the work requirement by (1) working a minimum of 80 hours per month; (2) participating in qualifying state employment and training programs for 20 hours per week; or (3) participating in workfare, public service work for which ABAWDs receive food stamp benefits.

In response to concerns that some ABAWDs were willing to work but were unable to find opportunities to meet the Food Stamp Program's new work requirement, the Balanced Budget Act of 1997 (P.L. 105-33) authorized increased funding for food stamp employment and training programs from fiscal year 1998 through fiscal year 2002, when the Food Stamp Program is scheduled to be reauthorized. To qualify for these additional federal funds, the states must maintain their state-funded expenditures for employment and training at a level no lower than in fiscal year 1996; these additional funds are referred to as maintenance-of-effort funds. To ensure that employment and training programs are targeted at ABAWDs, the act requires that at least 80 percent of all employment and training funds be spent on ABAWDs. The Balanced Budget Act also gave the states the option to exempt from the work

¹The U.S. Department of Agriculture's Food and Nutrition Service (FNS), which oversees the Food Stamp Program, reviews the states' requests for waivers and approves those that meet the criteria.

requirement up to 15 percent of their ABAWD population not residing in a waived area or otherwise exempted from the work requirement.

This letter provides information on (1) trends in ABAWD participation in the Food Stamp Program, including recent data on ABAWDs who are living in waived areas, exempted from work requirements, participating in qualifying employment and training activities, or working; and (2) the extent to which the states have used employment and training program funding.

ABAWD PARTICIPATION IN THE FOOD STAMP PROGRAM HAS DROPPED RAPIDLY SINCE FISCAL YEAR 1996

As presented in figure 1, FNS' preliminary estimates show that the number of ABAWDs participating in the Food Stamp Program has dropped from a monthly average of 1,133,000 in fiscal year 1996 to a monthly average of 362,000 in fiscal year 1999—an estimated 68-percent drop. This decline has occurred even though most states have used waivers and/or exemptions to exclude portions of their ABAWD population from the work requirement.

Figure 1: Average Monthly ABAWD Participation in the Food Stamp Program, Fiscal Years 1996 to 1999

Source: FNS.

As of January 2001, 36 states and the District of Columbia have waivers for at least one county, city, or Indian reservation with either high unemployment or an

insufficient number of jobs. (See table 1 in enc. I.) The states' use of waivers is comparable to the level we reported for June 1999.² FNS does not require the states to report the number of ABAWDs living in areas covered by waivers. However, based on our survey of food stamp officials in 42 states, we estimated that in the spring of 1998 about 40 percent of ABAWDs were living in areas covered by FNS waivers.³

The states increased their use of exemptions for ABAWDs between fiscal years 1999 and 2000. In fiscal year 2000, 36 states exempted a total monthly average of about 14,000 ABAWDs not living in areas waived from the work requirement. In fiscal year 1999, 33 states exempted a total monthly average of 9,400 ABAWDs not living in areas covered by waivers—less than 3 percent of the total estimated number of ABAWDs participating in the Food Stamp Program in that year. (See table 2 in enc. I.)

In fiscal year 2000, a monthly average of about 71,400 ABAWDs participated in qualifying food stamp employment and training activities, including workfare.⁴ (See enc. II.) About 81 percent of these participants engaged in workfare, while the remaining 19 percent participated in other employment and training activities. About 82 percent of the ABAWDs participating in employment and training activities lived in areas not covered by waivers. In fiscal year 1999, a monthly average of about 71,100 ABAWDs participated in qualifying employment and training programs. About 85 percent of these participants engaged in workfare, while the remaining 15 percent participated in other employment and training activities. About 78 percent of the ABAWDs participating in employment and training activities lived in areas not covered by waivers.

Data are not currently available on the number of ABAWDs participating in the Food Stamp Program who work. FNS does not require the states to collect and report these data. However, preliminary data from an FNS study of the ABAWD population indicates that a substantial portion of ABAWDs who receive food stamp benefits are working, according to an FNS official.

THE STATES HAVE NOT USED A SUBSTANTIAL PORTION OF THE FUNDS MADE AVAILABLE FOR FOOD STAMP EMPLOYMENT AND TRAINING PROGRAMS

In fiscal year 2000, the states spent \$98 million, or only 30 percent, of the \$330 million available for employment and training programs. (See table 3 in enc. III.) As shown in figure 2, funds available for food stamp employment and training programs have

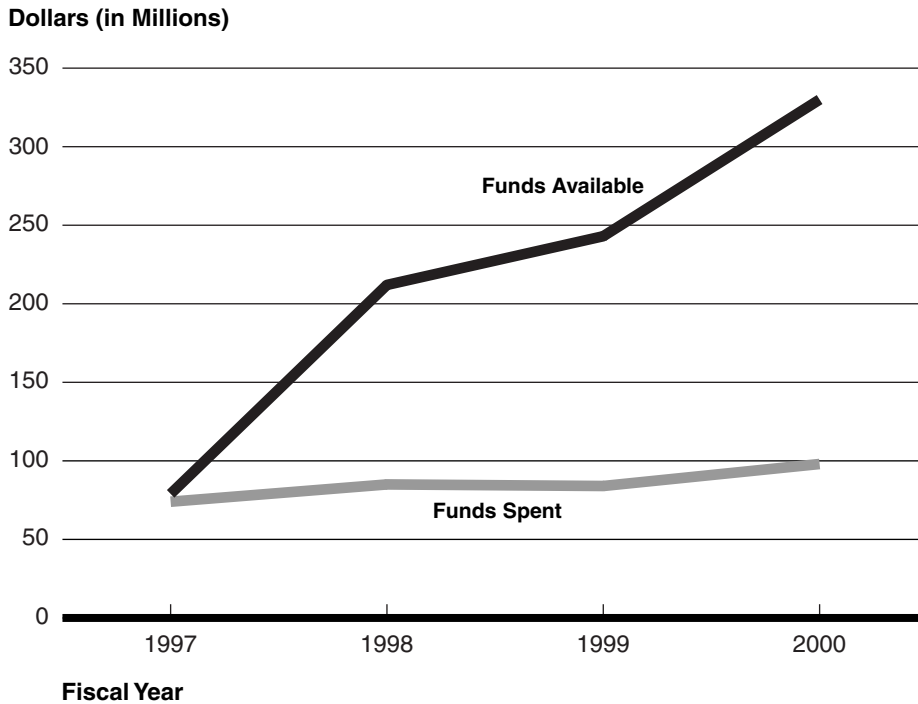

²For example, only four states changed their waiver status: Arkansas, California, and Utah used waivers for certain areas in June 1999, but did not use waivers in January 2001; Oregon did not use waivers in June 1999, but used waivers for certain areas in January 2001. See *Food Stamp Program: How States Are Using Federal Waivers of the Work Requirement* (GAO/RCED-00-5, Oct. 20, 1999).

³*Food Stamp Program: Information on Employment and Training Activities* (GAO/RCED-99-40, Dec. 14, 1998).

⁴The Personal Responsibility and Work Opportunity Reconciliation Act excluded job search and job search training as allowable employment and training program components.

grown rapidly since fiscal year 1997, while spending has remained fairly constant. Funds available for employment and training programs have grown, in part, because they can be carried over to subsequent fiscal years. In fiscal year 2001, \$426 million are available for employment and training programs through fiscal year 2001 appropriations and the carryover of prior-year funds.

Figure 2: Funds Available and Spent for Food Stamp Employment and Training Programs, Fiscal Years 1997 to 2000

Source: FNS.

In fiscal year 2000, 30 states, the District of Columbia, Guam, and the Virgin Islands spent less than half of their employment and training allocations. (See table 4 in enc. III.) This low level of spending reflects both the rapid decline in the number of ABAWDs receiving food stamp benefits as well as states' decisions about how to structure their programs. For example, eight states and the Virgin Islands have elected not to provide any qualifying employment and training activities for ABAWDs and had to limit their spending to at most 20 percent of their allocation.⁵ According to the Economic Research Service's October 2000 report, these states said that they

⁵The Balanced Budget Act requires that the states spend at least 80 percent of their employment and training funds to serve ABAWDs. Even though these states do not spend any funds on ABAWDs, they are still eligible to spend up to 20 percent of their allocated funds to serve non-ABAWDs.

did not have enough participating ABAWDs to justify the cost of expanding services.⁶ These states generally disagreed with the Balanced Budget Act's requirement that 80 percent of the food stamp employment and training funds be spent on ABAWDs.⁷

In addition, 20 states and the District of Columbia were ineligible to receive maintenance-of-effort funding in at least 1 year from fiscal year 1998 through fiscal year 2000 because their use of state funds was less than their fiscal year 1996 expenditures. (See table 5 in enc. III.) For example, New York spent more than \$19 million of state funds per year in fiscal years 1998 to 2000 but was not eligible for maintenance-of-effort funding in any of these years because it had spent \$22.9 million on employment and training in fiscal year 1996. Conversely, 15 states and the Virgin Islands were automatically eligible for maintenance-of-effort funding because they did not spend any state funds on employment and training in fiscal year 1996 and, therefore, did not have a maintenance-of-effort requirement. For example, North Dakota qualified for \$145,000 in maintenance-of-effort funding in fiscal year 2000, even though it did not spend any of its own funds on employment and training activities in that year.

AGENCY COMMENTS

We provided the U.S. Department of Agriculture with a draft of this report for review and comment. Officials from the Department's Food and Nutrition Service agreed with the factual accuracy of the information presented.

SCOPE AND METHODOLOGY

To accomplish our objectives, we interviewed FNS officials and obtained FNS data for fiscal years 1999 and 2000 on ABAWD participation in the Food Stamp Program, the states' use of work requirement waivers and exemptions for ABAWDs, and the states' use of employment and training funds. This report updates information in our October 1999 report on ABAWD participation in the Food Stamp Program and states' waivers of ABAWDs from work requirements. This report also updates information in our December 1998 report and the Economic Research Service's October 2000 report on the extent to which the states have used employment and training program funds. We conducted our review in January 2001 in accordance with generally accepted government auditing standards.

⁶U.S. Department of Agriculture, Economic Research Service, *Report to Congress on State Use of Funds to Increase Work Slots for Food Stamp Recipients* (Oct. 2000).

⁷The states also have expressed concern about the amount of available funding for each ABAWD employment and training slot. In response, FNS has designated 13 states as alternative reimbursement states, which are not limited to the reimbursement rate of \$175 for each filled slot, provided they agree to offer a qualifying employment and training slot to all ABAWDs who do not live in waived areas.

As arranged with your office, unless you publicly announce its contents earlier, we plan no further distribution of this report until 7 days after the date of this letter. At that time, we will send copies of the report to the House Committee on Agriculture; the Subcommittee on Agriculture, Rural Development, and Related Agencies of the Senate and House Committees on Appropriations; and other appropriate congressional committees; the Honorable Ann M. Veneman, the Secretary of Agriculture; and the Honorable Mitchell E. Daniels, Jr., Director, Office of Management and Budget. In addition, we will make copies available to others on request.

Please contact me at (202) 512-7215 if you or your staff have any questions about this report. Major contributors to this report were Richard Cheston and Debra Prescott.

Sincerely yours,

A handwritten signature in black ink that reads "Robert Robertson". The signature is written in a cursive, flowing style.

Note: The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 allows ABAWDs to meet the work requirement by (1) working a minimum of 80 hours per month; (2) participating in qualifying state employment and training programs for 20 hours per week; or (3) participating in workfare, public service work for which ABAWDs receive food stamp benefits. The act excluded job search and job search training as allowable employment and training program components. Totals may not add due to rounding.

FUNDING FOR FOOD STAMP EMPLOYMENT AND TRAINING PROGRAMS

Table 3: Appropriations and Expenditures for Employment and Training Programs, Fiscal Years 1997-2000

(Dollars in thousands)

Fiscal year	Base program appropriation	Maintenance-of-effort appropriation ^a	Carryover of prior year funds	Total available	Total spent
1997	\$79,000	^b	^c	\$79,000	\$73,917
1998	\$81,000	\$131,000	^c	\$212,000	\$84,487
1999	\$84,000	\$31,000 ^d	\$127,513	\$242,513	\$84,151
2000	\$86,000	\$86,000 ^d	\$158,362	\$330,362	\$98,099
2001	\$88,000	\$106,000 ^d	\$232,263	\$426,263	^e

^aTo qualify for maintenance-of-effort funds in a given year, the states are required to maintain their state-funded expenditures for employment and training at a level no less than they did in fiscal year 1996.

^bBeginning in fiscal year 1998, additional federal funding was made available for states that met the maintenance-of-effort requirement in the Balanced Budget Act of 1997.

^cThe Balanced Budget Act of 1997 authorized the Secretary of Agriculture to carry over any unspent base program funding and maintenance-of-effort funding, effective in fiscal year 1998.

^dThe Balanced Budget Act of 1997 originally established maintenance-of-effort funding at \$131 million per year for fiscal years 1998-2001. Subsequently, the Agricultural Research, Extension, and Education Reform Act of 1998 (P.L. 105-185) reduced the funding to \$31 million in fiscal year 1999 and \$86 million in fiscal year 2000. Funding for fiscal year 2001 was reduced by \$25 million in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act for fiscal year 2001 (P.L. 106-387).

^eTotal spending data for fiscal year 2001 are not yet available.

^aFNS allocates maintenance-of-effort funds among all states. However, the states can spend this allocation only if their state-funded expenditures for employment and training are at least at a level spent in fiscal year 1996.

^bFNS subsequently reallocated its base and maintenance-of-effort allocations for fiscal year 2000 and prior years in response to states' requests for additional funding, as allowed by the Food Stamp Act of 1977 (as amended). Expenditures data are preliminary as of February 2001.

^eEight states and the Virgin Islands were eligible to spend no more than 20 percent of their allocation for fiscal year 2000 because they elected not to serve ABAWDs.

^dData were available for only the first three quarters of fiscal year 2000.

Note: To qualify for maintenance-of-effort funds in a given fiscal year, the states are required to maintain their state-funded expenditures for employment and training at a level no lower than in fiscal year 1996.

^aGuam did not have enough ABAWDs in fiscal years 1998 to 2000 to receive a maintenance-of-effort allocation, regardless of spending toward the maintenance-of-effort requirement, according to an FNS official.
