

441 G St. N.W.  
Washington, DC 20548

January 31, 2014

The Honorable Orrin G. Hatch  
Ranking Member  
Committee on Finance  
United States Senate

**Private Health Insurance: The Range of Base Premiums for Individuals Age 19 and 64 in the Individual Market by State in January 2013**

Dear Senator Hatch:

Millions of Americans obtain health coverage by purchasing private health insurance,<sup>1</sup> including over 11 million individuals who purchased individual market plans in 2011.<sup>2</sup> These Americans may be purchasing individual health insurance for a variety of reasons, including being self-employed or a small business owner, or because their own employer does not offer insurance. In 2013, in most states, under applicable law, individual health insurance market premium rates could have varied on the basis of age, gender, health status, and other factors. In addition, states could have varied in their specific requirements for what insurers could consider in underwriting—the process of assessing the health status of the insurance applicant and setting the premium according to the health risk of that individual.<sup>3</sup> Historically, with certain exceptions, when individuals purchasing coverage in the individual market went through the underwriting process, their coverage could have been denied, offered at a higher-than-average premium, or offered with a rider that excluded coverage of a preexisting condition.<sup>4</sup>

The Patient Protection and Affordable Care Act (PPACA) included a number of provisions that changed private health insurance requirements, and these changes could affect the cost of individual market health insurance premiums. For example, under PPACA, insurers may not deny coverage to individuals based on preexisting conditions or use gender or health status to set premium rates, and they are restricted in the amount they can vary premiums based on age and tobacco use.<sup>5</sup> PPACA also included an individual mandate that requires most individuals to have health insurance coverage or pay a tax penalty.<sup>6</sup> These PPACA provisions were not

<sup>1</sup>Private health insurance includes individual and group market plans. Participants in the individual market purchase health insurance coverage directly from an insurance carrier. Group market participants generally obtain health insurance coverage through a group health plan, usually offered by an employer.

<sup>2</sup>Centers for Medicare & Medicaid Services, *The 80/20 Rule: How Insurers Spend Your Health Insurance Premiums* (Baltimore, Md.: February 15, 2013).

<sup>3</sup>Bernadette Fernandez, Congressional Research Service, *Drivers of Premium Increases and Review of Health Insurance Rates* (Washington, D.C.: January 20, 2012).

<sup>4</sup>A preexisting condition is a health condition that exists before someone applies for or enrolls in new health insurance coverage.

<sup>5</sup>See the Patient Protection and Affordable Care Act (PPACA), Pub. L. No. 111-148, § 1201, 124 Stat. 119, 154 (2010) (codified at 42 U.S.C. § 300gg(a)(1)(A)).

<sup>6</sup>Pub. L. No. 111-148, §§ 1501, 10106, 124 Stat. 242, 907, as amended by the Health Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152, §§ 1002, 1004, 124 Stat. 1029, 1032, 1034 (codified as amended at 26 U.S.C. § 5000A).

required to be met until 2014. As a result, beginning in January 2014, the way insurers calculate base premiums may change.<sup>7</sup>

The Center for Consumer Information and Insurance Oversight (CCIIO) within the Department of Health and Human Services' (HHS) Centers for Medicare & Medicaid Services (CMS) maintains an online portal—the HealthCare.gov Plan Finder—that displays insurers' premiums to assist consumers in comparing health insurance coverage options in the individual market.<sup>8</sup> In January 2013, the data displayed on the HealthCare.gov Plan Finder included insurers' base premiums prior to underwriting. These premium amounts were not subject to the PPACA provisions that took effect in 2014. They represented the lowest premium amounts that would have been available to different categories of individuals at that time, and were subject to an underwriting process that could have resulted in higher premiums depending on an individual's health status, for example the presence of a preexisting condition.

In July 2013, we reported the range of base premiums for private health insurance coverage options for different categories of individuals in each of the 50 states and the District of Columbia as they were displayed for individuals on the HealthCare.gov Plan Finder in January of 2013.<sup>9</sup> You asked us to expand our analysis to include ranges of base premiums for additional categories of individuals that would represent individuals whose premiums would be among the lowest and highest based on age. In the enclosures to this letter, we are reporting the range of base premiums that were displayed for young adults (age 19), and older adults not yet eligible for Medicare (age 64). For both age categories, we are reporting the range of base premiums displayed for nonsmoking and smoking individuals in each of the 50 states and the District of Columbia on the HealthCare.gov Plan Finder in the month of January 2013.

To examine the range of base premiums that was displayed on the HealthCare.gov Plan Finder, we analyzed data maintained by CCIIO. The data included insurers' base premiums for health plans that were publically available to consumers through the Plan Finder in the month of January 2013.<sup>10</sup> Because insurers may have established different rates for individuals for a variety of factors, the data represent base premium amounts prior to underwriting, rather than the actual premium amount an individual may have been charged. Actual premium amounts could have been higher than the base rates, as they would have been determined after more complete underwriting for health conditions and other factors, and some individuals could have

---

<sup>7</sup>In addition, beginning January 1, 2014, premium tax credits and cost-sharing subsidies became available under PPACA for qualified individuals. Premium tax credits may be used to reduce monthly premiums, and cost-sharing subsidies decrease out-of-pocket expenses such as deductibles and copays.

<sup>8</sup>This online portal was established pursuant to a requirement in PPACA, Pub. L. No. 111–148, §§ 1103(a), 10102(b), 124 Stat. 119, 146, 892 (codified at 42 U.S.C. § 18003). The Plan Finder can be found at <http://finder.healthcare.gov/> (accessed December 23, 2013).

<sup>9</sup>See GAO, *Private Health Insurance: The Range of Base Premiums in the Individual Market by State in January 2013*, GAO-13-712R (Washington, D.C.: July 23, 2013). We reported the range of premiums for six categories of individuals, including 30-year-old nonsmoking and smoking males and females, a family of four, and a 55-year-old couple.

<sup>10</sup>Insurance companies may offer multiple health insurance products in each state, and multiple health plans may be available for each product. For example, the same product may have plans with different cost sharing features. In addition, insurance companies can vary premiums on the basis of county or zip code, and each variation represents a different health plan in the Plan Finder. Therefore, in some states there can be a high number of plans available statewide.

been denied coverage, for example because of pre-existing conditions.<sup>11</sup> The base premium amounts and supporting plan information were self-reported by each insurance company, and each company was required to comply with a data validation and attestation process. However, our analysis may not reflect the entire universe of insurers' base premiums because roughly 20 percent of all insurance companies did not submit data. In addition, our analysis may include plans with little or no enrollment because enrollment data were not available at the plan level.<sup>12</sup> We calculated an annual premium based on monthly amounts submitted by insurers. We developed base premium ranges for each of the 50 states and the District of Columbia for different categories of consumers. Our state-wide premium ranges do not represent the range of base premiums that would have been displayed for all individuals in the state, because individuals search the Plan Finder on the basis of their zip codes and insurers may have offered some plans only in specific regions of a state. We also developed premium ranges for an urban and a rural zip code in four select states—Illinois, Nevada, Pennsylvania, and Texas—to illustrate how base premiums can vary within randomly selected urban and rural locations. Although we selected zip codes within each state randomly, states were selected on the basis of geographic location and included one state from each of the four census regions.<sup>13</sup> To assess the reliability of these data for the purpose of our study, we: reviewed the requirements for the data validation and attestation process; reviewed documentation on the database that houses the information submitted to CCIO, including the user manual and the business rules that govern how rates are rendered to consumers through the Plan Finder; and interviewed key CCIO officials responsible for overseeing the submission and maintenance of the data. We determined that the 2013 data were sufficiently reliable for our purposes.

We conducted our work from November 2013 to January 2014 in accordance with all sections of GAO's Quality Assurance Framework that are relevant to our objectives. The framework requires that we plan and perform the engagement to obtain sufficient and appropriate evidence to meet our stated objectives and to discuss any limitations in our work. We believe that the information and data obtained, and the analysis conducted, provide a reasonable basis for any findings and conclusions.

The range of base premiums for 19- and 64-year-old individuals in the individual market that was displayed on the HealthCare.gov Plan Finder as of January 2013 in each of the 50 states and the District of Columbia is reported in enclosure I. Enclosure II shows the range of base premiums for the same categories of individuals for urban and rural zip codes in four states.

## Agency Comments

The Department of Health and Human Services reviewed a draft of this report and provided technical comments, which we incorporated as appropriate.

---

<sup>11</sup>For example, GAO previously reported that, based on national data from the first quarter of 2010, on average, 19 percent of applicants for individual insurance coverage were denied coverage. See GAO, *Private Health Insurance: Data on Application and Coverage Denials*, [GAO-11-268](#) (Washington, D.C.: March 16, 2011).

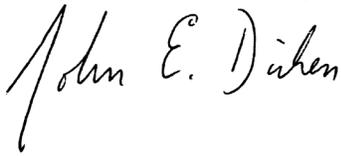

<sup>12</sup>HealthCare.gov data included enrollment information at the product level. However, multiple plans may be associated with a single product; therefore, plan-level enrollment data were not available.

<sup>13</sup>Urban and rural classifications were based on the Rural-Urban Commuting Area (RUCA) codes developed by the Department of Agriculture's Economic Research Service, which are based on patterns of urbanization, population density, and daily commuting patterns.

-----

As arranged with your office, unless you publicly announce its contents earlier, we plan no further distribution of this report until 30 days after its issue date. At that time we will send copies of this report to the Secretary of Health and Human Services and other interested parties. In addition, the report will be available at no charge on GAO's website at <http://www.gao.gov>. If you or your staff have any questions about this information, please contact me at (202) 512-7114 or [dickenj@gao.gov](mailto:dickenj@gao.gov). Contact points for our Offices of Congressional Relations and Public Affairs may be found on the last page of this report. Major contributors to this report were Gerardine Brennan, Assistant Director; Todd D. Anderson; George Bogart; Erin Henderson; and Laurie Pachter.

Sincerely yours,

A handwritten signature in black ink that reads "John E. Dicken". The signature is written in a cursive style with a large initial "J" and "D".

Coinsurance (percent)	50	20	10

Source: GAO analysis of Center for Consumer Information and Insurance Oversight (CCIO) data.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

Legend: N/A=Not applicable (value was not reported by the insurer)

Source: GAO analysis of Center for Consumer Information and Insurance Oversight (CCIO) data.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

**Table 51: In Missouri, the Range of Annual Base Premiums Prior to Underwriting in the Individual (Nongroup) Market for Individuals, Age 19, Displayed on the HealthCare.gov Plan Finder in January 2013**

Consumer type	Plan with minimum premium	Plan with median premium	Plan with maximum premium
<b>Single male, nonsmoker, age 19</b>	<b>1,547 plans available</b>

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

Source: GAO analysis of Center for Consumer Information and Insurance Oversight (CCIO) data.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

Source: GAO analysis of Center for Consumer Information and Insurance Oversight (CCIO) data.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

The number of plans available state-wide may not reflect the total number of plans available to all individuals in the state, as insurers may offer some plans only in specific regions of a state. A single insurer may offer several plans within a state, and these plans may vary in the base premium or in the plan details, such as network and cost-sharing options.

Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

Source: GAO analysis of Center for Consumer Information and Insurance Oversight (CCIO) data.

Notes: Because insurers can impose different premiums on individuals on the basis of a variety of factors, the data represent the base premium amount, rather than the actual premium amount an individual would be charged. Actual premiums could be higher because they would be determined after more complete underwriting for health conditions and other individual factors.

Urban and rural classifications were based on the Rural-Urban Commuting Area (RUCA) codes developed by the Department of Agriculture's Economic Research Service which are based on patterns of urbanization, population density, and daily commuting patterns. Data reflect available information for all plans for which data were displayed on HealthCare.gov as of January 2013 and may include plans with little or no enrollment.

## GAO's Mission

The Government Accountability Office, the audit, evaluation, and investigative arm of Congress, exists to support Congress in meeting its constitutional responsibilities and to help improve the performance and accountability of the federal government for the American people. GAO examines the use of public funds; evaluates federal programs and policies; and provides analyses, recommendations, and other assistance to help Congress make informed oversight, policy, and funding decisions. GAO's commitment to good government is reflected in its core values of accountability, integrity, and reliability.

---

## Obtaining Copies of GAO Reports and Testimony

The fastest and easiest way to obtain copies of GAO documents at no cost is through GAO's website ([www.gao.gov](http://www.gao.gov)). Each weekday afternoon, GAO posts on its website newly released reports, testimony, and correspondence. To have GAO e-mail you a list of newly posted products, go to [www.gao.gov](http://www.gao.gov) and select "E-mail Updates."

---

## Order by Phone

The price of each GAO publication reflects GAO's actual cost of production and distribution and depends on the number of pages in the publication and whether the publication is printed in color or black and white. Pricing and ordering information is posted on GAO's website, <http://www.gao.gov/ordering.htm>.

Place orders by calling (202) 512-6000, toll free (866) 801-7077, or TDD (202) 512-2537.

Orders may be paid for using American Express, Discover Card, MasterCard, Visa, check, or money order. Call for additional information.

---

## Connect with GAO

Connect with GAO on [Facebook](#), [Flickr](#), [Twitter](#), and [YouTube](#). Subscribe to our [RSS Feeds](#) or [E-mail Updates](#). Listen to our [Podcasts](#). Visit GAO on the web at [www.gao.gov](http://www.gao.gov).
